| 1.0 | Jody Baldwin | 2014-06-06 | Document created and submitted to Simple-Press for review. |

Purpose

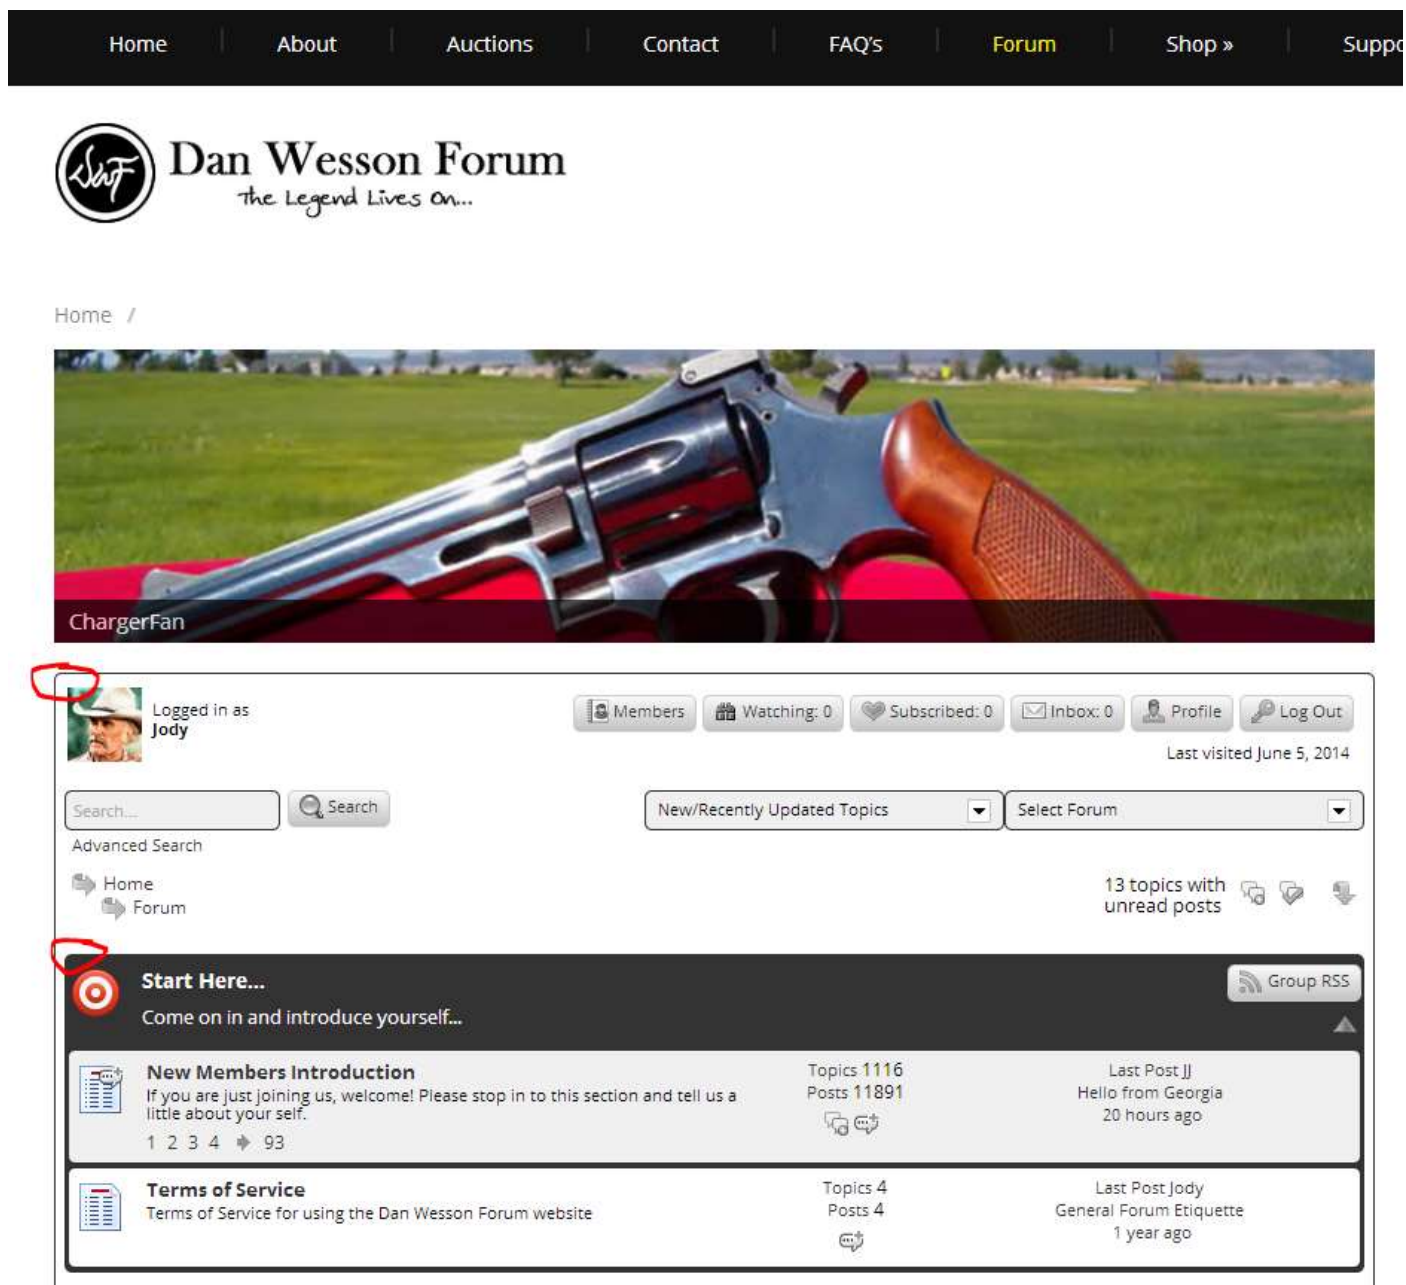

The purpose of this document is to outline the desired modifications to the Simple-press default theme that is currently in use on the Dan Wesson Forum website.

Modifications

The following sections outline the specific modifications desired.

General

In order to make the forum appear more integrated into the overall site I would like for the corners of forum to be square. The image below shows the forum along with a portion of the site to show the contrast.

I would also like to incorporate the colors that are used elsewhere on the site if possible. The table below shows the colors used in the navigation.

Main Navigation Menu Colors

Background Color

#111111

Hover Font Color

#000000

Background Hover Color

#8DB529

Selected Menu Color

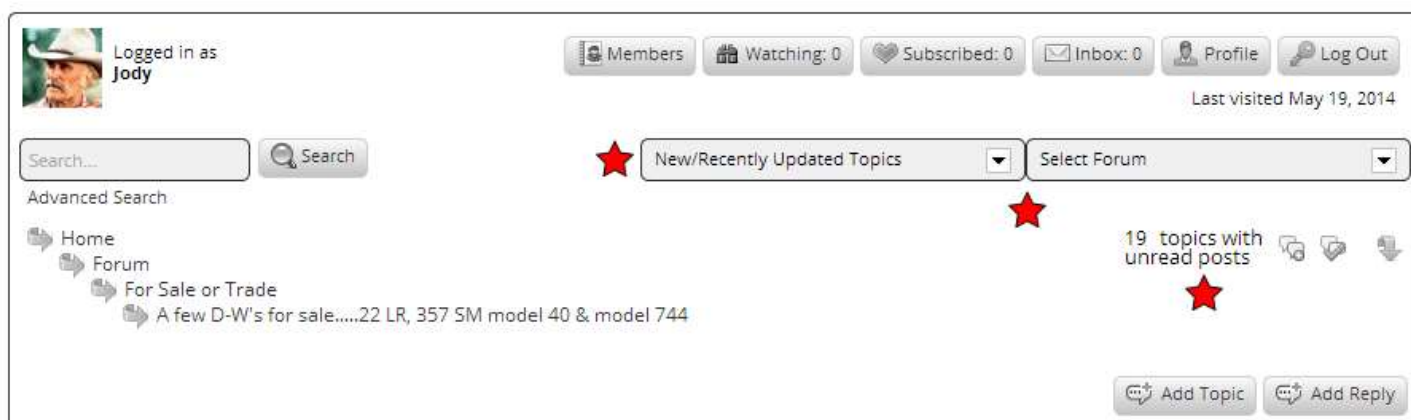

#FCF414

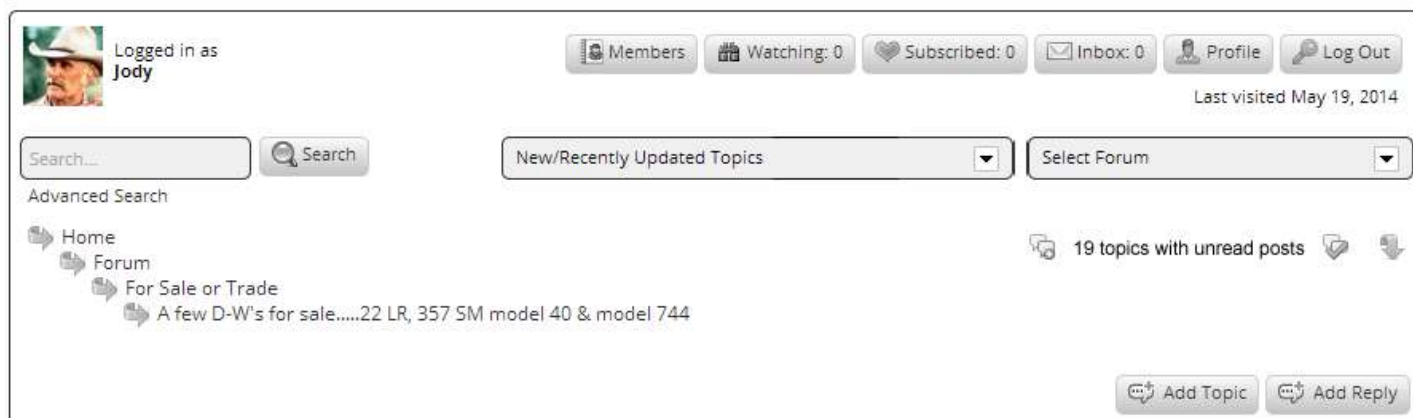

Page Header

There are three modifications that we would like made to the header.

- **New/Recently Update Topics** – Lengthen the New/Recently Updated Topics dropdown box to prevent topic titles from wrapping.
- **White Space** – Add white space between the New/Recently Updated Topics and Select Form dropdown boxes.
- **Unread Topics Area** – Move the 'Most Recent Unread Post' icon to the left of the unread topic count and widen the area for the count to prevent wrapping.

The altered image below shows the modifications outlined above.

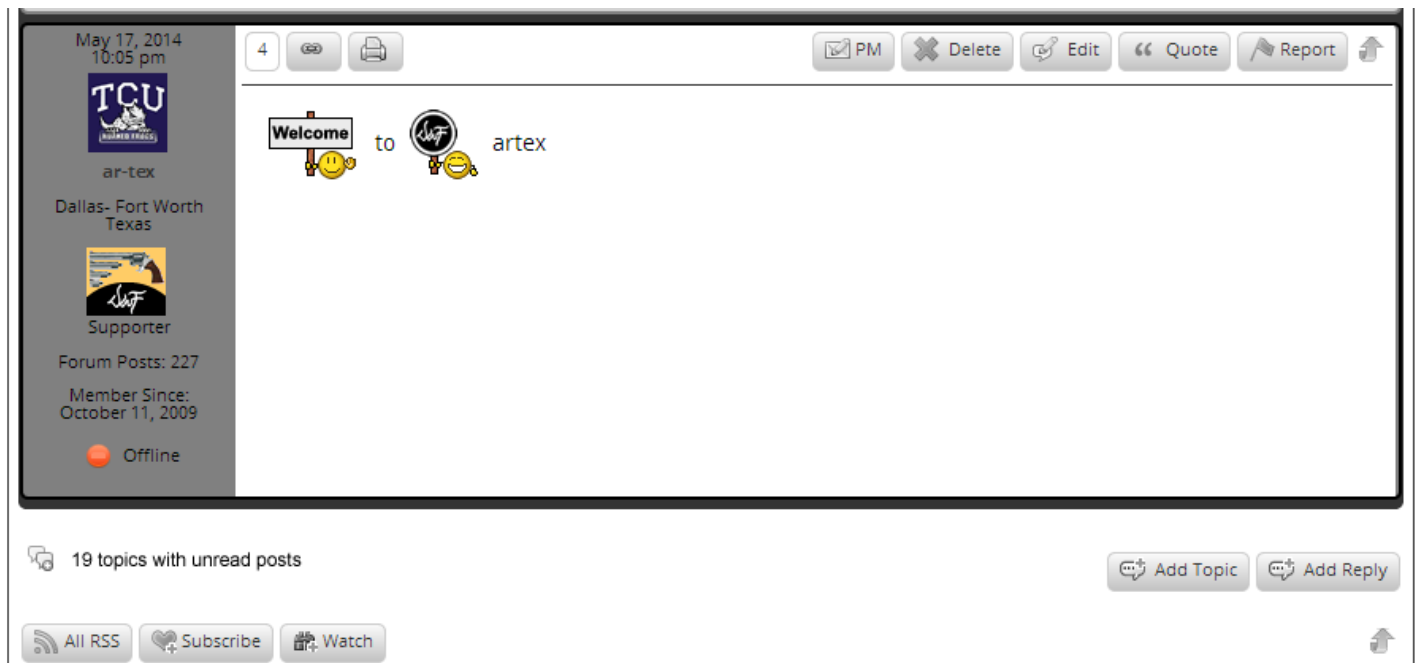

Post Footer

One modification is desired at the bottom of a thread:

- Add Unread Topics icon and unread post count to the area indicated with the red star ★ below.

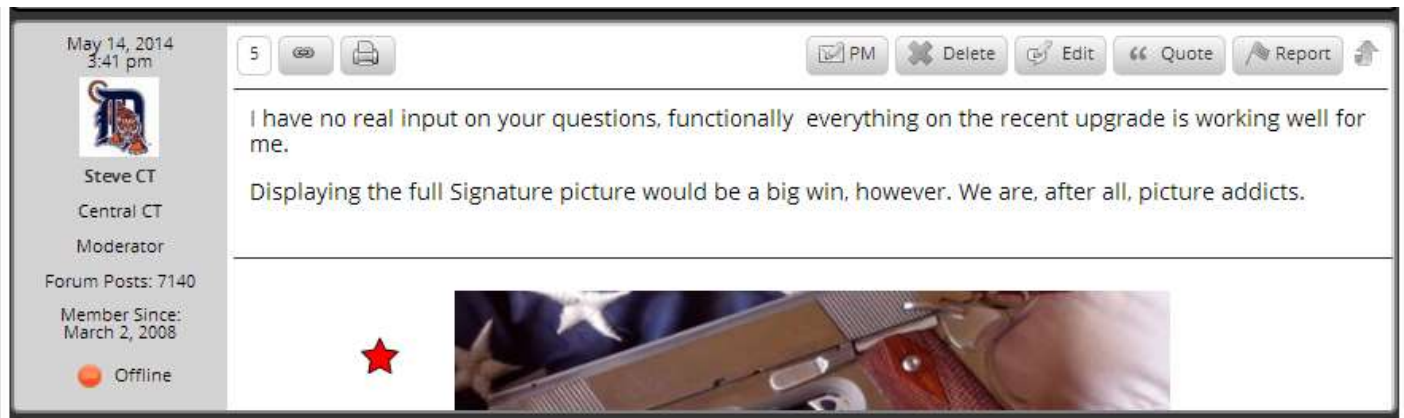

The altered image below shows how this modification.

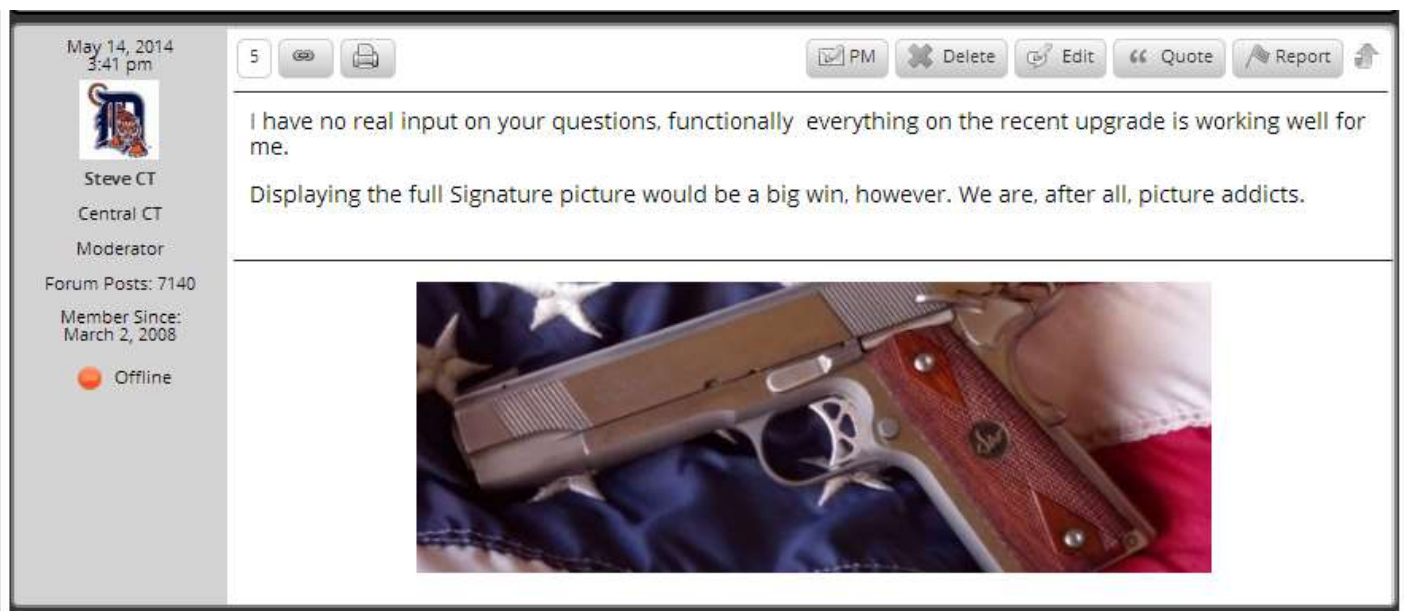

Signature

Currently member's signature picture is not displayed in its entirety even though the maximum signature width and maximum signature height for signatures images are set to 0. This may be a bug in the core software but if this can be handled through the theme our goal is to show the entire image.

The image below shows how the signature should look.

New Post Footer

There are several modifications to this area that we feel would enhance the user's experience. Those modifications are:

- **Remove Unused Icons and Sizing** – We don't typically upload documents on the Dan Wesson Forum therefore we don't need View Existing Media Uploads or View Existing File Uploads. Ideally the user should be able to view all uploads by clicking a single button. The Upload Attachments button is currently out of alignment and sized differently than the others. All buttons should be the same dimensions.
- **Move Smileys** – Move smiley's below options to submit post and cancel.
- **Options** – Combine Options and buttons to Preview, Cancel, Post, etc. in the same section.

View Existing Image Uploads
View Existing Media Uploads
View Existing File Uploads
Upload Attachments

Statistics Area

There are several modifications we would like to the statistics area in the footer. Those modifications are:

- Member Stats – Move member statistics under forum statistics
- New Members – Move new member list between Forum Stats and Top Posters list vertically.
- Guest Posters – We no longer allow guest to post so this statistics is no longer necessary.
- Display User Group Members – Display the members of three forum user groups above the administrators and moderators.
- Administrators and Moderators – List administrators and moderators on the same line.

Unread and Recently Updated Topics

Currently Unread and Recently Updated Topics are only displayed in list forum when you are logged out and when you log in the list disappears. Ideally this section would display after the member logs in as well.
