

A great design... a commitment to quality

DanWesson Arms .38/.357 magnum double-action revolvers

For more than a century the Wesson family of Massachusetts has been making quality firearms, creating a proud tradition of fine craftsmanship.

Today Dan Wesson, representing his family's fourth generation in the firearms industry, manufactures double-action revolvers which are **THE MOST ACCURATE, THE MOST VERSATILE, THE MOST DEPENDABLE .38/.357 magnums on the market. . . BAR NONE!**

Each revolver is produced under exacting conditions using precision machining techniques and strict quality control. And each boasts the unique Dan Wesson design that accounts for its accuracy, versatility and dependability.

ACCURACY The exclusive combination of a barrel under tension and secured at both ends with a cylinder latch close to the barrel-cylinder gap and a flat muzzle makes Dan Wesson revolvers the most accurate ones on the market.

VERSATILITY Every revolver can be adapted to handle a variety of shooting situations in a matter of minutes because of the unique interchangeability of barrels, shrouds and grips. . . and, on target revolvers, interchangeable colored front sight blades.

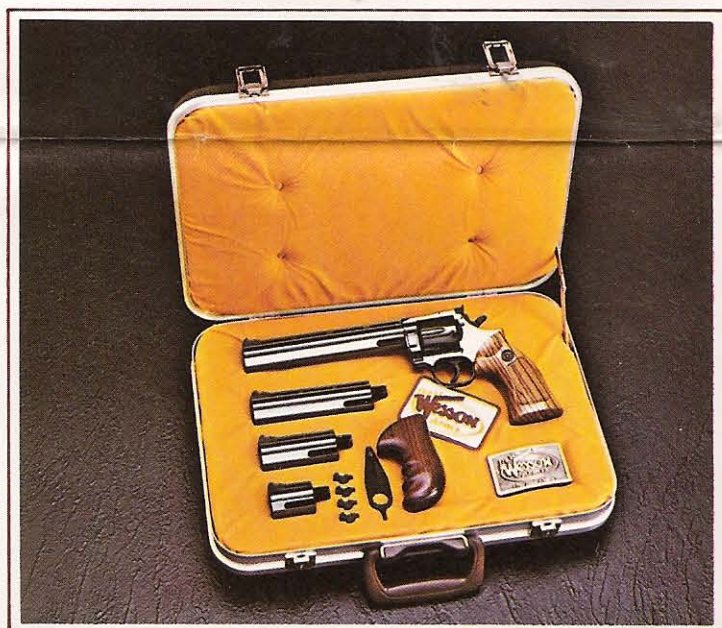

DEPENDABILITY Because of the unique lock work and the design and placement of the parts inside the frame, Dan Wesson revolvers will function under the most adverse conditions. And, of course, all frames, barrels and cylinders are made of the finest quality alloyed chrome molybdenum steel, making them exceptionally strong.

In addition, Dan Wesson Arms revolvers boast these features:

- Fewer parts than other double-action revolvers. . . easiest to service and to repair because all parts inside the frame but one are interchangeable.
- A built-in "fail-safe" device to prevent accidental firing if dropped.
- Test firing of every revolver before it leaves the factory.

FIVE YEAR WARRANTY ON EVERY REVOLVER

a proud possession: The DanWesson Arms PISTOL PAC

To begin, choose an 8" Dan Wesson revolver in the Series of your choice. Then add three more interchangeable QUICKSHIFT barrel assemblies (2 1/2", 4", 6"), an extra interchangeable grip, four additional colored front sight blades (2 yellow and 2 white) and a Dan Wesson Arms belt buckle and emblem. Place them in a handsome carrying case and you have the Dan Wesson Arms Pistol Pac. . . a proud possession.

The superb craftsmanship of Dan Wesson Arms revolvers demands the very finest in engraving. Shown above are examples which reflect the painstaking and brilliant artistry of the country's most masterful engravers. (Left to right): Class A, 1/4 engraving; Class B, 1/2 engraving; Class C, 3/4 engraving. Class D engraving (not shown) is complete coverage of the entire gun with the exception of the hammer and trigger. Special custom engraved models with precious metal inlays are also available.

Here's what makes Dan Wesson revolvers unique

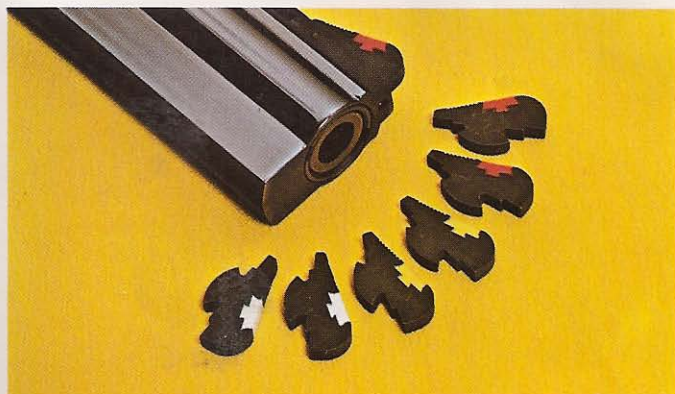

INTERCHANGEABLE BARRELS AND SHROUDS

Unique **QUICKSHIFT** barrel assemblies — consisting of shrouds and barrels — provide the ultimate in interchangeability of barrel lengths and styles. In addition to the standard 2½", 4", 6" and 8" barrel lengths, **Dan Wesson Arms introduces 10", 12", and 15" barrel assemblies for target revolvers to satisfy the growing demand and requirements of long range handgun hunters and metallic silhouette shooters.** Each of the seven barrel assemblies is interchangeable in less than a minute. Style, as well as lengths, can also be changed. For example, if you own a 6" gun in the 15-2 Series you can purchase three different style shrouds (ventilated rib, heavy, ventilated rib heavy) to fit the 6" barrel.

REAR SIGHT WITH WHITE OUTLINE

Also offered as standard equipment on all target models is a white outline on the rear sight to present a finer sight picture.

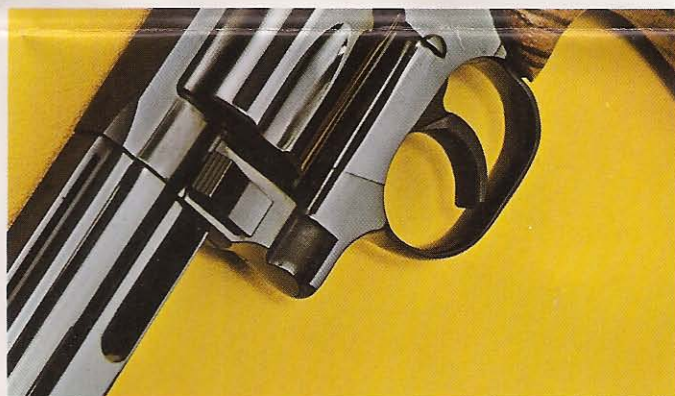

INTERCHANGEABLE COLORED FRONT SIGHT BLADES

Interchangeable **QUICKSHIFT** front sight blades with red inserts are standard on all Dan Wesson Arms target models, offering the shooter even greater opportunity for increased accuracy in any shooting situation. (Yellow and white sight blades are available, should you wish to specify the sight blade color of your choice.)

INTERCHANGEABLE GRIPS

Beautifully grained walnut and zebrawood grips are interchangeable on any Dan Wesson revolver. Choose from (clockwise): Walnut blank, already inletted to fit the gun, for those who wish to carve their own grip; Oversize Target (smooth walnut); Oversize Target (checkered zebrawood); Combat (smooth walnut); Sacramento (smooth walnut); Oversize Target (checkered walnut); and Oversize Target (smooth zebrawood).

FRONT PLACEMENT OF CYLINDER LATCH

The unique placement of the cylinder latch — up front where it belongs close to the barrel/cylinder gap — stabilizes the cylinder in its alignment to the barrel, thus increasing accuracy. In addition, the design and placement of the latch allows the Dan Wesson revolver to take more abuse than any other double-action revolver made.
